Summary: City Council will consider awarding a contract for the construction of the Downtown Streetscape Project. The Council will also consider the proposed funding plan for the project.

Background: On November 6, 2019, Council approved the plans and specifications and directed staff to advertise for bids for the Construction of the Downtown Streetscape Project, Specification No. 19-18. This project consists of traffic lane reconfigurations with dedicated left turn lanes and expansion of traffic lane widths. The project also includes new traffic signals, which will be demand-based instead of timed. Pedestrian facilities will be enhanced to include sidewalks widened to a minimum of 10', bulbouts at intersections and repairs to any broken or uneven sidewalks. The project also includes streetscape features such as additional street trees, bicycle racks and outdoor dining locations.

Discussion: On November 13, 2019, bids were released to all A Classification Contractors as well as the Builders Exchanges. Specifications were also posted to the City's website and published in the Ukiah Daily Journal on November 17th and 24th, 2019. A mandatory pre-bid meeting was held on December 4, 2019, with five potential bidders in attendance.

Bids were received until 2:00 p.m. on Wednesday, February 5, 2020, at which time five bids were received and opened by the City Clerk. The bid tabulation is provided as Attachment 1. Bids were received from Granite Construction Co., Ghilotti Construction Co., Argonaut Construction, Team Ghilotti, Inc. and Wahland Construction, Inc.

After careful review of the bids received, Ghilotti Construction has been found to be the lowest responsible bidder, with a bid submitted in the amount of \$6,448,215.95. Please refer to Attachment 2 for a copy of their bid.

Please note: Wahlund Construction's bid in the amount of \$19,298,932.26 was calculated based on the actual unit price submitted in their bid for line item 75, as instructed by the bid documents. This brought their total bid much higher than they originally intended. The bid as originally submitted had a total bid amount of \$6,936,307.26.

This project has several secured funding sources, including grants and committed funds. The project also requires the use of funds from other identified sources, including utility impact contribution, Gas Tax, and RDA bond proceeds. It is important to note that, even ten years ago, Staff and City Councils understood that grants would not cover the entire cost of the project. The expectation was that redevelopment funds would be used to close the funding gap; though most of those funds were lost with the Statewide elimination of redevelopment, the City still has access to a portion of the "bond proceeds," which are hereby being applied to the project. The breakdown of the funds recommended for this project is included as Attachment 3.

Funding Recommendation

The City currently has \$3,475,102 of funds committed to this project by grant or Council action. With the competitive bids submitted, Staff has identified additional funds as shown in Attachment 3. The following narrative explains the portion of the attached spreadsheet that is "Recommended Additions."

Gas Tax

These funds are discretionary for a variety of transportation projects. The utilization of these funds was presented to Council on November 6th in conjunction with the Engineer's Estimate and the plans and specifications.

SB1

These funds are discretionary to some degree, but can only be used on streets that are classified as collector or larger. State Street meets this criteria. These funds are a relatively new source, having now been available for the past three years. These funds were utilized for the reconstruction of Washington Avenue and Orchard Avenue in previous cycles.

Redevelopment Bond Proceeds

As previously stated, the pre-2011 expectation was that redevelopment funds would be used to close the funding gap; though most of those funds were lost with the Statewide elimination of redevelopment, the City still has access to a portion of the "bond proceeds," which are hereby being applied to the project.

Utilities

As with other street reconstruction projects, the utilities pay for the areas of the road and sidewalk that they impact. Staff has calculated out each utility's share based on square footage disturbance for both road and sidewalk. The actual amount will be based on measured field quantities.

With these funding sources (previously secured and proposed), the total amount available for the project is \$7,375,102, which covers the cost of the project plus a 10% contingency at \$644,822 and project management services up to \$265,000. At this time, Staff recommends awarding the contract for the construction of the Downtown Streetscape Project to Ghilotti Construction in the amount of \$6,448,215.95, as well as approving the corresponding budget amendment based on the proposed funding sources as identified in Attachment #3.

Recommended Action: Award a contract for the Downtown Streetscape and Road Diet, Specification #19-18 to Ghilotti Construction in the amount of \$6,448,215.95 plus City Engineer approved change orders up to 10% of the original Bid, \$644,822, for a total of \$7,093,037.54 and associated budget amendment.
