Trees from the Required Street Tree List, Required Parking Lot Tree List, Required Parks Tree List, and Required Riparian Tree List are also appropriate for planting in a residential setting.

The trees in these tables were selected based on their ability to thrive in the conditions unique to each setting (street planter strip, parking lot, park, riparian area). In order to provide for the long-term health and vitality of the tree selected, it is recommended that the tree selected be compatible with the residential setting in which it would be planted (e.g lawn and irrigation, overhead lines, creek side, pavement/impervious surfaces, limited drainage).
